## Summary

Hi everybody, I am Peter from China. I have been in EVA FILM industry for many years. As many glass related workers still not believe in EVA FILM, they don't believe that EVA FILM can replace PVB FILM in many fields.

In the same time, EVA FILM has many advantages against PVB FILM.

So i think it's my job to spread EVA FILM knowledge to more people.

If you want to learn more, go to our EVA FILMS' INFO blog: [www.evafilms.com](http://www.evafilms.com) .

---

## Experience

### **Product Manager at CNC GLASS INTERLAYER TECH CO.**

October 2009 - Present (3 years 10 months)

CNC GLASS INTERLAYER TECH is a vibrant innovator providing multiple solutions in the glass film field. We specialize in EVA Films(Ethylene Vinyl Acetate), Smart Films/PDLC Films(Polymer Dispersed Liquid Crystal), Rear Projection Films, LED Films, etc, which meets various requirements for different glass application.

Innovation and customization leads us forward, and customers' satisfaction builds up our credit. With professional service, guaranteed quality and competitive price, we have won great reputation in many countries.

As technology develops and new market needs, we keep making progress and proceeding to be ahead in the glass film industry.

CNC INTERLAYER TECH is always on the way to be your glass film partner.
